

New Sony Alpha DSLRs

Thursday, 07 May 2009

Photos of the new Sony Alpha DSLRs - A230, A330 and A380- are on the SonyStyle Canada website.

No doubt that the announcement is very close. Mix of black and silver color on the new cameras are very cool in my opinion, really attractive for the customers who are looking for an entry level DSLR. It is also obvious that the new lenses have AF/MF switch on the lens body indicating the micromotors (or even SSM).
